Municipal Administration.

CHAPTER IV.
Production and Distribution.

Weather and crops.

42. Appendix XVII gives the figures of rain-fall for all the Talukas in the State during the year under report. The average yield of crops were annas 8. The rains were not timely and hence the crops suffered.

43. Wages. The daily wages of unskilled and skilled labourers throughout the State ranged from annas 4 to 6 and from annas 8 to 10 respectively according to the nature of the work. Appendix XVIII will show the prices of staple food-grains in the State.

44. Forests. There are no forests belonging to the State.

The village Malgaon which is about six miles distant from Miraj exports a considerable quantity of beetle-nut leaves. There is no other trade or manufacture worth the name in the State.

46 Workshop. The Miraj Workshop has been making the same satisfactory progress as last year. There is no change worth mentioning as regards the out-turn and the expenditure.

47. Public Works. The expenditure on Public Works was Rs. 65,468-10-4 against Rs. 62,814-6-2 of the last year. Appendix XIX will supply the further details regarding the subject.

48. Post and Telegraph Offices. There are in all 8 Post offices in the State. Miraj Town has a Telegraph office also.

49. Mint. There is no mint in the State.

50. General condition of the State and people. The majority of the State subjects consists of the farmer class. There are no trades or manufactures worth the name in the State. The condition of the subjects of the State therefore greatly depends upon the nature of each year's season. Owing to scarcity of rain for the last 10 years the condition of the farmers is not good. They can-not therefore devote their energies or surplus income to the improvement of the soil. As regards the general condition of the people, I do not think there is any appreciable change under this head. The rain-fall being sufficient but not timely the condition of the people remains almost the same as last year. Owing to the scarcity of fodder the farmer class have got no sufficient living stock, the result being that there was much difficulty in getting bullocks for the field work.

Number of Schools and Scholars.

66. Besides the schools shown above there were 14 unaided vernacular schools giving instruction to 508 pupils. Thus there were in all 46 schools providing instruction for 2,427 pupils againt 50 schools providing instruction for 2,724 pupils in the last year. The percentage of pupils to, population was therefore 3·2 against 3·2 of the last year.

69. The school sent up 21 candidates for the Matriculation Examination of whom 8 passed. The figures for the last year were 12 sent up and 6 passed.

Scholarships.

70. Out of the 6 scholarships of this State 4 are for general competition and two for back-ward Classes–one for Mahomedans and the other for Marathas or other low caste boys.

Drawing Classes.

71. The number attending the Drawing classes was 179 against 133 of the last year. Out of 8 boys who appeared for the First Grade Art Examination two passed under all the heads, one boy appeared for the Second Grade and he came out successful.

Manual Training.

72. The progress of the Manual training imparted to the boys in the High school is, I am glad to observe, very encouraging & satisfactory. The class is managed by a teacher in carpentary and is supervised by the State Overseer. Periodical Examinations are held under his supervision and the result of these examinations shows very satisfactory progress. Of course much remains to be done in this direction, still from the past experience it can be said that the boys who are backward in their mental training take special liking for this kind of work &c, it is believed when such boys leave the school they will derive much advantage by this sort of training. As a sort of stimulus to the boys certain scholarships are awarded to them who pass successfully in the periodical examinations. These scholarships are named as "Ferris "scholarships.

73. The Gymnasium was in good order and was availed of by boys as usual.

74. The examination results of all the schools in the State show a good percentage on the whole.

CHAPTER VIII.

The num–ber of souls living under this State is 80,281 against 81467 as compared with the last Census. The decrease is chiefly due to the ravages of plague. Of the No. 40,774 are males and 39,507 are females. The following table will give compar ative Statement of the increase or decrease of the population in the three Talukas of the State.

This visit was the first of its kind in the annals of Indian History and its most beneficial and far-reaching effects are acknowledged on all hands. In memory of this visit, celebrations were held in all the towns and villages throughout the length and breadth of the country and the State had taken her part in these joyous celebrations. The 12th of December 1911 was fixed as the day on which these celebrations were to be

Extradition.

35. Two offenders were surrendered to the British Government for trial during the year.

Prisons.

36. Besides the Central Jail at Miraj, which is in charge of the Medical Officer Miraj, there are two sub-jails one at Lakshmeshwar and the other at Modnimb. They are sufficient for the requirement of the State. The details under this head will be found in Appendix XIII.

37. Out of the 78 prisoners, 8 suffered from fever, ague &c. All of them recovered. The health of the rest was good. On account of the Grand Coronation Darbar held at Delhi 2 male and 2 female prisoners were released and the others that were of good conduct were granted remission of 1 month per year in conformity with the rules made by the British Government.

38. The conduct of the prisoners was good, and no one was sentenced under Section 34 of Bombay Act II of 1874.

Registration.

39. Appendices XIV, and XV will give detailed particulars of the Registration Department.

Municipal Administration.

40. Appendix XVI will show the receipts and expenditure of the five Municipalities in the State. The Miraj Municipality continued under the direct supervision of the State.

CHAPTER IV.

Production and Distribution.

Weather and crops.

41. Appendix XVII gives the figures of rain-fall for all the Talukas in the State during the year under report. The average yield of crops were annas 4. The rains were not timely and were insufficient and hence the crops suffered a great deal.

Wages.

42. The daily wages of unskilled and skilled labourers throughout the State ranged from annas 4 to 6 and 8 to 10 respectively, according to the nature of the work. Appendix XVIII will show the prices of staple food-grains in the State.

Forests.

43. There are no forests belonging to the State.

Trade and Manufactures.

44. There is one ginning and pressing mill at Miraj and three ginning factories at Laxmeshwar. The village Malgaon which is about 6 miles distant from Miraj exports a considerable quantity of beetle-nut leaves. There is no other trade or manufacture worth the name in the State.

Workshop.

45. Miraj Workshop has been making the same satisfactory progress as last year. There is no change worth mentioning as regards the out-turn and the expenditure.

Public Works.

46. The expenditure on Public Works was Rs. 98,754- 4-11 against Rs. 65,468-10- 4 of the last year. As the supply of water from the old site was found to be scanty another site had to be sought for. The State Over-Seer was asked by the Chief to find out such a site. He therefore made various trials and consulted a number of books on the subject. At last a site was fixed upon near the village Takli. A well is dug there in the bed of stream and the water of this well is led to the town by means of cast iron pipes. The scheme has proved successful and by this means the supply of water to the town of Miraj is increased. The State Over Seer and his staff deserve much credit for carrying out the project which is nearing its completion. The expenses increased upon now are Rs 50,712-5-4 and Rs 1,5,000- 0-0 more will be required to complete the work. Appendix XIX will supply the further details regarding Public Works.

Post and Telegraph Offices.

47. There are in all 8 Post offices in the State. Miraj Town has a Telegraph office also.

Mint.

48. There is no mint in the State.

General condition of the State and people.

49. The majority of the State Subjects consists of the farmer class. There are no trades of manufactures worth the name in the State. The condition of the subjects of the State therefore greatly depends upon the nature of each year's season. Owing to scarcity

of rain this year and for the last 10 years the condition of the farmers is not good. They cannot therefore devote their energies or surplus income to the improvement of the soil. As regards general condition of the people I do not think there is any appreciable change under this head. The rain fall being scanty and not timely the condition of the people was rather worse than that of the last year. Owing to the extreme scarcity of fodder the farmer class has got no sufficient living stock, the result being that there was much difficulty in getting bullocks for the field work.

CHAPTER V.

62. The expenditure incurred by the State for maintaining this department was Rs. 983-2-9 against Rs. 998-0-11 of the last year.

63. The sanitation of all the towns and villages of the State was properly looked after.

CHAPTER VII.

Instruction.

64. There were 37 schools during the year under report as against 32 of the last year. The attendance of these schools was 2,557 against 1,919 of the last year. Appendix XXV will show in details the particulars regarding the management of the schools.

Number of Schools and Scholars.

65. Besides the schools shown above there were 12 unaided vernacular schools giving instruction to 430 pupils. Thus there were in all 49 schools providing instruction for 2,987 pupils againt 46 schools providing instruction for 2,427 pupil in the last year. The percentage of pupils to population was therefore 3·6 against 3·2 of the last year.

66. The total expenditure on account of education was Rs 22,561-14-3 against Rs. 20,870-6-2 of the last year.

The Miraj High-School

67. At the annual examination of the school 177 boys presented themselves for the examination of whom 102 passed under all the heads. The percentage of passed to presented was 57·6.

68. The school sent up 21 candidates for the Matriculation Examination of whom 13 passed. The figures for the last year were 21 sent up and 8 passed.

69. Out of the six scholarships of this State 4 are for general competition and two for back-ward Classes-one for Mahomedans and the other for Marathas or other low caste boys.

Scholarships.

70. The number attending the Drawing classes was 214 against 179 of the last year. Out of 16 boys who appeared for the First Grade Art Examination six passed under all the heads three boys appeared for the Second Grade and one came out successful. One boy who appeared for the Third Grade was also successful. Shrimant Tatyasaheb the elder son of the Chief passed in the First Grade Drawing Examination this year.

Drawing Classes.

71. The progress of the Manual training imparted to the boys in the High-school is, I am glad to observe, very encouraging and satisfactory. The class is managed by a teacher in carpentary and is supervised by the State Overseer. Periodical Examinations are held under his supervision and the result of these examinations shows a very satisfactory progress. Of course much remains to be done in this direction, still from the past experience it can be said that the boys who are backward in their mental training take special liking for this kind of work &c, it is believed when such boys leave the school they will derive much advantage by this sort of training. As a sort of stimulus to the boys certain scholarships are awarded to them who pass successfully in the periodical examinations. These scholarships are named as " Ferris " scholarships.

Manual Training.

72 The Gymnasium was in good order and was availed of by boys as usual.

73. The examination results of all the schools in the State show a good percentage on the whole.

CHAPTER VIII.

Miscellaneous.

74. The State records are preseved under the supervision of the Sar Nyayadhish and the Huzur Record Keeper and the Mamaledar of the three Talukas.

CHAPTER IV.

Production and Distribution,

41. Weather and crops. Appendix XVII gives the figures of rain-fall for all the Talukas in the State during the year under report. The average yield of crops was annas 10. Rains were timely and sufficient except in Modnimb Taluka. The average yield of crops there was 4 annas and the rain-fall there was much below the average, the crops therefore suffered to a great extent.

42. Wages. The daily wages of the skilled and unskilled labourers throughout the State ranged from annas 5 to 6 and 8 to 10 respectively, according to the nature of the work. Appendix XVIII will show the prices of staple food-grains in the State.

43. Forests. There are no forests belonging to the State.

44. Trade and Manufactures. There is one ginning and pressing mill at Miraj and three ginning factories at Laxmeshwar. The village Malgaon which is about 6 miles distant from Miraj exports a considerable quantity of beetle-nut leaves. There is no other trade or manufacture worth the name in the State.

45. Workshop. Miraj Workshop has been making the same satisfactory progress as last year. There is no change worth mentioning as regards the out-turn and the expenditure.

46. The expenditure on Public Works was Rs 49,577-5-8 against Rs 98,754-4-11 of the last year. As regards water works commenced in the last year, another well is dug out and another pipe line is laid down from it to the town for high level distribution at the expenses of Rs 28,120-10-7 as against Rs. 50,712-5-4 of the last year. Both these lines are working satisfactorily under gravitation and the town is copiously supplied with water even during the driest season; showing that their is no necessity of increasing the supply any more. Only some pipes will be reqûired to be laid down for distribution next year at the expense of about Rs. 3000. Appendix XIX will supply the further details regarding public works.

Public Works.

47. There are in all 8 Post offices in the State Miraj Town has a Telegraph office also.

48. There is no mint in the State.

Mint.

49. The majority of the State Subjects consists of the farmer class. There are no trades of manufactures worth the name in the State. The condition of the subjects of the State therefore greatly depends upon the natue of each year's season. There was good rain in the Miraj and Lakshmeshwar Talukas. The rates in the markets were also high. Consequently the condition of the farmers has improved during this year. The labour rates were also high and the condition of the labourers was also satisfactory. But this does not hold good in the case of the Modnimb Taluka where owing to scarcity of rain and fodder the farmer class and the cattle stock, (on which they have greatly to depend) suffered much.

General condition of the State and people.

69. Out of the six scholarships of the State 4 are for general competition and two for back-ward Classes-one for Mahomedans and the other for Maraths or other low caste boys.

Scholarships.

70. The number attending the Drawing classes was 201 aginst 214 of the last year. Out of 14 boys who appeared for the First Grade Art Examination 10 passed under all the heads. Three boys appeared for the Second Grade and all came out successful.

Drawing Classes.

71. The progress of the Manual training imparted to the boys in High-school is, I am glad to observe, very encouraging and satisfactory. The class is managed by a teacher in carpentary and is supervised by the State Overseer. Periodical Examinations are held under his supervision and the result of these examinations shows a very satisfactory progress. Of course much remains to be done in this direction, still from the past experience it can be said that the boys who are backward in their mental training take special liking for this kind of work and it is believed when such boys leave the school they will derive much advantage by this sort of training. As a sort of stimulus the boys are awarded certain scholarships, who pass successfully in the periodical examinations. These scholarships are named " Ferris " scholarships.

Manual Training.

72. The Gymnasium was in good order and was availed of by boys as usual.

73. The examination results of all the schools in the State show a good percentage on the whole.

CHAPTER VIII.

Miscellaneous.

74. The State records are preseved under the supervision of the Sar Nyayadhish and the Huzur Record Keeper and the Mamaledars of the three Talukas.

Record.

75. There is a printing press at Miraj kept at State expense. It is generally used for printing official forms and other work required by the several departments of the State.

Printing Press.

76. Every Taluka station has its own library supported by the state grants and local subscriptions. There are also three reading rooms two in the Miraj Taluka and one in the Laxmeshwar Taluka.

Library.

77. In conclusion, I am desired by the Chief to thank you and the Assistant Political Agent S. M. Country for the kind advice given in the administration of the State.

I have honour to be,

Sir,

Your most obedient Servant

G. K. AGASHE.

The average yield of crops was annas 10. Rains were timely except in Modnimb Taluka. The average yield of crops there was only one anna. The average rain-fall in Modnimb is In20-30Cents while the total rain-fall this year was In 12-54 Cents only. There was therefore great scarcity of foddor and the out-turn of crops was very meagre.

Wages.

42. The daily wages of the skilled and unskilled labourers throughout the State ranged from annas 8 to 10 and 5 to 6 respectively, according to the nature of the work. Appendix XVIII will show the prices of staple food-grains in the State.

43. There are no forests belonging to the tate.

Trade and Manufactures.

44. There is one ginning and pressing mill at Miraj and three ginning factories at Laxmeshwar. The village Malgaon which is about 6 miles from Miraj exports a considerable quantity of beetle-nut leaves. There is no other trade or manufacture worth the name in the State.

Workshop.

45. Miraj Workshop has been making the same satisfactory progress as last year. There is no change worth mentioning as regards the out-turn and expenditure.

46. The expenditure on Public Works was Rs 48846 8-10 against Rs 49577-5-8 of the last year. As regards water work commenced in 1912, the pipe lines are working satisfactorily under gravitation and the town is copiously supplied with water even during the driest season; showing that there is no necessity of increasing the supply any more.

Public Works.

The following short note on the Takli water works constructed during the year 1911–1912 for the supply of water for the Miraj Town under the supervision of Mr. B. G. Jog, L. C. E., State Overseer, is added at the desire of the Resident Kolhapur and the Political Agent S. M. C. States orally expressed by him at the time of his last official visit to Miraj. the Resident when he visited the water work greatly appreciated the scheme.

Owing to scanty Rain-fall during the last decade, the old water works failed to supply the necessary quantity of water to the town and in the hot season especially the distress of the residents was most acute. To supply the want a survey was made and the present site was at last selected. It is about 3 miles distant from the town and is in the bed of the Malgaon brook. This is the main water work. A supplimentary water work of the same nature is also constructed in the bed of the Malewadi Brook. The main water work is about 50 feet above the level of the town while the supplimentary water work is on a little lower height. Two pipes of 6 "and 4" are laid out from these, and they give the supply of water to the town. The present water works are sufficient to supply 10 gallons per head to obout three quarters inhabitants of the town while the remaining one quarter receives its supply from the old water work and this quantity is quite sufficient for drinking and culinary purposes.

The present sites of the water works are as said above in the bed of the two brooks. These small brooks take their rise from the two hills named Dandoba and old Panhala, and all the rain water is carried to the river Krishna by these two drains to which they join at about twelve miles distance from their sources. Their beds are composed of sand and gravel and lime stone to a depth of about 10 feet under laid by hard impermeable rock. The water while being carried to the river percolates through the gravel and is retained in its place by the rock which does not allow it to escape. This was indicated by the growth of the Shin-di trees that do not flourish without a constant supply of water and by the irrigation wells in the lands adjoining the site that is now selected. The water percolating through the gravel and lime stone is naturally rendered pure and healthy. It flows to the town by the law of gravitation and there-fore no permanent recurring expenditure is required to be undergone.

The construction of the works is as follows. The bed of the brook is cut right across the stream from one bank to the other. The breadth of the trench is 6 feet and the depth is about 15 feet below the bed of the stream. The first 10 feet depth is composed of loose sand and gravel while the next 3 feet of lime stone and the lowest 2 feet of solid rock. The upstream side is built with dry stone

masonary without solid mortar joints and is backed up with large rubble and round pebbles of sand and gravel so as to allow the under ground percolation. While the other wall, that on the down stream side of the trench as well as the two side flanks are built with solid mortar joints so as not to allow any water to escape through them. Thus the water collected in the trench has only but one passage through which it can escape, and that is through the main pipe fixed in the wall in the lower stream side at the height of one foot above the bottom of the trench. This one foot of depth below the main pipe is reserved for the deposit of silt that may pass through.

The two walls are arched over and room is left for persons going down to examine the water and to take away the silt from time to time when occasion requires.

To avoid the expenditure of excavation the pipes are laid down in a round about way and thus the length of the main line is about 4 miles though the actual distance of the site of the water works is much less. The expences incurred are about 81,000 Rs.

The old water works are reserved in tact and they continue to supply drinking water to a particular portion of the town.

The whole scheme is thought out, planned and executed by Mr. Jog and thanks are due to him for carring out the scheme.

Appendix XIX will supply further details regarding public works.

47. Post and Telegraph Offices. There are in all 8 Post offices in the State. Miraj Town has a Telegraph office also.

48. Mint. There is no mint in the State.

49. General condition of the State and people. The majority of the State Subjects consists of the farmer class There are no trades of manufactures worth the name in the State. The condition of the subjects of the State therefore greatly depends upon the nature of each year's season. There was good rain in the Miraj and Lakshmeshwar Talukas. The rates in the markets were also high. Consequently the condition of the farmers has improved during this year. The labour rates were also high and the condition of the labourer was also satisfactory. The condition of the Rayats in the Modnimb Taluka continued the same or was even worse than that of the last year. As said in para 41 the rain was below average on the whole. In Miraj and Laxmeswar Talukas it was sufficient for the crops. But in the Modnimb Taluka it was not at all sufficient. The total rain-fall in that Taluka was only 12 In. 54 cents. The natural result was there was much scarcity of fodder and water. Number of people left their villages with their cattle to support themselves on labour. The wages in other parts of the country were high enough to support them and their

cattle. The State Karbhari visited almost all the villages in the Taluka and asked the Rayats to join the test works, which were intended to be opened. But the people refused to work, on low wages. They asked for Takvi and nothing else. Attempts were made to increase the supply of drinking water by digging wells still further, but the attempts were successful in very few cases. Takvi advances were made to the extent of Rs 5,713. Thanks are due to the British Authorities at pandhar-pur for having allowed concession rates of fodder to the State Rayats provided they produced certificates from the State authorities to the effect that they were Rayats from Modnimb Taluka.

Number of Schools and Scholars.

65. Besides the Schools shown above there were 11 unaided vernacular Schools giving instruction to 354 pupils. Thus there were in all 43 Schools providing instruction for 2,165 pupils against 50 Schools providing instruction for 2,848 pupils in the last year. 14 boys were sent up for the vernacular fina examination this year out of them 9 were sussessful. The percentage of pupils to population was there-fore 2·6 against 3·4 of the last year.

Shrimant Tatyasaheb and Shrimant Dadasaheb, the two sons of the Chief, passed in the Second Grade Examination this year.

Drawing Classes.

71. The progress of the Manual training imparted to the boys in High-school is, I am glad to observe, very encouraging and satisfactory. The class is managed by a teacher in carpentary and is supervised by the State Over-seer. Periodical Examinations are held under his supervision and the result of these examinations shows a very satisfactory progress. Of course much remains to be done in this direction, still from the past experience it can be said that the boys who are backward in their mental training take special liking for this kind of work and it is believed when such boys leave the school they will derive much advantage by this sort of training. As a sort of stimules the boys are awarded certain scholarships, who pass successfully in the periodical examinations. These scholarships are named " Ferris " scholarships.

Manual Training.

72. The Gymnasium was in good order and was availed of by boys as usual.

73. The examination results of all the schools in the State show a good percentage on the whole.

Rains were timely, though rather more than usual. Miraj, Lakshmeshwar and Modnimb got 35-32, 19-32, 26-59 inches of rain this year while they had only 23-15, 24-65, and 12-54 respectively last year. The water of the river Krishna also rose and remained to an unusual height which caused great trouble to the in-habitants of the villages which stand on the bank of the river. Some crops especially in the Mali lands were consequently damaged and many houses fell down owing to the continual rain-fall. But all the precautionary measures were taken to help such men and it is fortunate that no life was lost.

Appendix XIX will supply further details regarding public works.
